## **PROHIBITION OF THE USE OF OPEN SPACE (HERITAGE PARK) IN FRONT OF THE ALUMNI CENTRE**

There have been unrelenting pressures from members of the community for the conversion of the open space in front of the Alumni Centre to a ceremonial ground. In fact, there had been an indiscriminate use of the space by staff and students for various activities. This act has detracted from the environmental aesthetics of the Oduduwa Road.

In keeping with its resolute determination for sustainable maintenance of the University's physical environment, the management wishes to notify the community that **all ceremonial activities in whatever form on the space are prohibited forthwith**. The space is reserved for staff and students to appreciate nature, reflect on and engage the future in a more determined way, that is expected of an academic environment.

Management also wishes to draw the attention of the community to the indiscriminate crossing of the lawns by staff and students in the same areas. Everybody is requested to please use the walkways provided in the areas.

Management wishes to thank the community for a conscious effort at making our campus environment-friendly.
