**RE: MIGRATION TO DIGITAL MODE OF OPERATIONS IN THE UHS:  
UPDATE AND APPEAL**

The University Health Service started using the electronic mode of operations **for individual clients** beginning with students on Monday 06 May and extended the use to all other clients on Monday 10 June, 2024. **It should be noted that electronic mode of operations in UHS has come to stay in line with global best practices** and that the need to **edit** personal information **just once for every client** is one of its requirements. This is to provide **update and appeal for calmness and exercise of patience** for the editing. However, to reduce/remove the inconvenience going forward, UHS **plans to deploy personnel to the various Faculties/Centres etc** after the ongoing students medical screening for the required editing.

**All our esteemed clients are appreciated for choosing and supporting UHS to continue to render excellent service with compassion and welcome to please feel free to share suggestions.**

Thank you.

**G.O. Saliu, MANUPA, MNIM, MAUA**  
Registrar and Secretary to Council
