Special Release

07 August, 2015

### **BASIC CLINICAL AND INDUSTRIAL TOXICOLOGY COURSE**

The events of poisoning in Nigeria are on the increase. The Department of Chemical Pathology, College of Medicine, is organizing the above programme/course to address this challenge. Applications are, therefore, invited from the public on the training programme.

The Toxicological Workshop will build the capacities of participants/workers in principles, effects and consequences of toxicants. It will also expose interventionists to diagnosis and biomarkers.

Target Participants: Research Scientists, Physicians, Research Managers, Regulatory Affairs Specialists, Environmental Health Scientists, Health Officers, Hospital and Industrial Workers, especially those involved in handling chemicals: Laboratory Personnel, Pharmacy Workers, Specialist Nurses and Emergency Residents of Medicine. Chemical Pathologists are also eligible for the training.

#### **Topics include:**

- ② Basic Principles of Toxicology
- ② Factors Affecting Toxicity
- ② Clinical Toxicology
- ② Common Toxicants of Clinical Importance
- ② Effects & Consequences of Toxicity
- ② Toxicology and Carcinogenesis
- ② Therapeutic Drug Monitoring (TDM)
- ② Biomarkers of Toxicity
- ② Industrial Toxicology
- ② Methods in Toxicology
- ② Clinical Cases In Toxicology

There will be practicals during the training.

**Date:** 16 - 21 August, 2015

**Venue:** IAMRAT Conference Room, College of Medicine, UCH, Ibadan

**Time:** 10:00am

**Registration fee: ₦30,000:00 (Thirty Thousand Naira Only).**

Thank you.
